All Trading Parties

The March 2016 Software Release Project implemented 10 Approved Changes to the CMA CS, in accordance with CMA LWI 205. The impacts on Trading Parties from these are summarised below and the complete details are included in the updated Functional Design Document for the Release.

These Approved Changes deliver a combination of CMA CS fixes and enhancements. This resulted in a new version 4.4 of the CMA CS software being released to the Production environment with no regression of current functionality or system performance occurring.
