2. MARKET CODE CHANGE PROPOSAL DETAILS				
A	ISSUE or DEFECT WHICH THIS MARKET CODE CHANGE PROPOSAL SEEKS TO ADDRESS required under Market Code Part 8.7.1 (ii) (b)			

Background

MCCP048 provided for the introduction of X, Y meter coordinates in the market. Fields were introduced in the “meter details” table to record GIS X and Y coordinates of meter location and a GIS Free Descriptor Filed. This is visible in the LVI under “meter details” for each meter in the market. Currently these data items are updated in the Central Systems via periodic data upload. This occurs quarterly whereby the data owner, Scottish Water, provides the CMA with a complete dataset to be uploaded to the central system, this includes all updates that have occurred in the period.

Requirement.

There is a requirement to introduce new data transactions (flows) to allow for:

1. The provision of X, Y coordinates (new Meter creation) and the contents of the GIS Free Descriptor field when a new physical meter is notified in the Central Systems by the Wholesaler. This would also include notification of the data items to the LP that owns the SPID in respect of which the data items are submitted.
2. The updating (updating existing meters) of these GIS data items by the Wholesaler. This would also include notification of the data items to the LP that owns the SPID in respect of which the data items are submitted.
